health care is a team effort so why keep training for solo sprints introducing foundations of interprofessional collaborative practice in health care a unique new textbook that will equip you to become an effective member of interprofessional healthcare teams this completely new textbook is the first on the market to introduce the interprofessional education collaborative ipec 2011 2016 core competencies for interprofessional collaborative practice and to provide practice in applying these competencies to everyday practice expertly written by an interprofessional team for a wide variety of health professions students this textbook provides a solid foundation in the four core competencies values and ethics for interprofessional practice roles and responsibilities interprofessional communication and teams and teamwork it then elaborates each core competency by defining and describing each sub competency with a variety of interactive case studies caselets and exemplar case studies it then illustrates the contributions and interconnectedness of each provider s role to demonstrate how core competencies would be applied and put into action for improved patient outcomes unique three part units each addressing one of the four ipec core competencies to help you to understand the core competencies and learn how to apply them in your own profession unique detailed explorations of each sub competency for all four ipec core competencies thoroughly present the essential elements of each core competency for deep understanding of how to collaborate with other professions unique case studies caselets and exemplar case studies illustrate each competency and provide opportunities for you to apply your understanding of the material a variety of active learning activities driven by core content are integrated into each chapter unique global perspectives boxes and additional international resources highlight the important work being done internationally in interprofessional education and interprofessional collaborative practice research highlights help you to understand the reasoning and knowledge behind the core competencies learning outcomes and key points outline and review the main takeaways from each chapter

how can social workers be more effective in collaborative work what are the skills knowledge and values required for collaborative practice how does collaborative social work practice impact on the experience of service users and carers these questions are faced by social workers every day and interprofessional collaborative practice is high on the policy agenda for trainees and practitioners written primarily for social work students and practitioners although having relevance across the wider range of stakeholders this book explores the issues benefits and challenges that interprofessional collaborative practice can raise chapter by chapter the book will encourage the reader to critically examine the political legal social and economic context of interprofessional practice it also explores how social workers can work

effectively and collaboratively with other professions while retaining their own values and identity key features include activities to illustrate the ways in which collaborative working can impact upon the experiences of service users carers and practitioners discussions looking at the different people and organisations with whom social workers might work in practice examples of research and knowledge for practice a glossary to act as a useful quick reference point for the reader a companion website engaging and well written each chapter also includes case studies reflective questions and links to further reading and sources of information interprofessional collaboration in social work practice will be essential reading for social work qualifying students and for practitioners

interprofessional client centered collaborative practice icccp is collective by nature emerging as it does at the intersection of a wide variety of professional knowledge and scopes of practice many studies of icccp focus on the determinants or inputs of collaborative practice as well as on the results outputs or outcomes this is echoed methodologically as a preponderance of icccp teamwork studies primarily employ interview and survey data however close observations are also necessary to build understanding of the collective behavioral processes of interprofessional collaboration many authors point out the need for more studies of the actual practices of collaboration in many senses icccp represents what rittel and webber 1973 have called a wicked problem p 155 wicked problems are difficult or impossible to solve their solutions depend on incomplete contradictory and changing requirements that are often difficult to recognize and they are confounded by complex interdependencies between actors and agents drinka clark 2000 p 37 if ever there was a wicked problem innovation in icccp is surely one as a series of possible solutions to this problem the various case studies set out in this monograph are welcomed learning to become a competent health professional has always been a two part process that which focuses on classroom teaching and that which engages students in an apprenticeship with qualified professionals in real world settings universities colleges and institutes depend upon practice settings for the apprenticeship education of their health professional students practice education pe settings require competent health care professionals to deliver quality care to patients until recently the delivery of health profession education has been almost entirely discipline based with each discipline educating their own students in isolation whether on campus or in the community as is clear in this book there is now increasing emphasis on all health care professions to learn how to be competent collaborators this emerging shift in education has led to a new interest in different approaches to the delivery of health professional education approaches that embrace more opportunities for interactions amongst and between learners across health and human service social care professions pe settings are being recognized as ideal environments for interprofessional education ipe in which students can witness and practice how to work interprofessionally with others on healthcare teams that is to learn about with and from each other for the purpose of collaboration to improve quality of care the chapters in this book focus on the many issues that

confront healthcare professionals in their efforts to provide true interprofessional collaborative care with the patient or client as the center of focus the term practice tends to occupy a black box in interprofessional literature although it is frequently invoked in considerations of collaboration teamwork and team working it is seldom explicitly defined one exception comes from thistlethwaite jackson and moran 2013 who suggested that practice can be understood in three ways a as the enactment of a role or profession b as a moment of collective unity or performance and or c as a socially institutionalized and socially acceptable form of interaction requiring cognitive understanding and reflection p 54 this book deals in a number of ways with these three ideas thus providing a better understanding of the term practice by removing it from a black box and placing it within our concept of a partnership between a team of healthcare providers it is now recognized that effective icccp requires the active engagement of students from different professions using interactive learning methodologies to develop health professional students knowledge skills attitudes perceptions and behaviors as noted in this book icccp requires a complex adult learning andragogy approach that is most effective when integrated throughout a program of study moving from simple to more complex learning activities that bridge from post secondary to practice education settings educational accreditation standards being developed to stimulate the advancement of ipe will have an impact on policies in both the academic and clinical settings that encompass icccp continuing professional development cpd is an integral part of the learning continuum to ensure that icccp is built on a theory informed base and sustained in changing healthcare environments this book will serve as a much needed primer to inform cpd in all aspects of icccp the thoughtful and clearly articulated chapters contained here are therefore most welcome practical guides for practice educators and a very useful source of information for a broader audience of healthcare providers who are faced with the complex issues that confront enactment of true icccp

interprofessional education and collaboration an evidence based approach to optimizing health care is a groundbreaking text in the field of interprofessional education ipe and interprofessional collaborative practice ipcp as the health care industry continues to grow it is critical that those entering health care careers possess interprofessional competency and a collaborative skill set as such the world health organization and academic program accreditors have amplified their calls for interprofessional training this text guides the reader through the core competencies for interprofessional collaborative practice that have been set by the interprofessional education collaborative ipec and takes an inclusive approach to the education standards set by professional programs that are members of the health professions accreditors collaborative hpac including the commission on accreditation of the athletic training education caate authored by a team of experts representing seven health care professions this text uses simple definitions and uniform terminology to supply a foundational basis for ipe and ipcp introductory topics include building professional knowledge of self and others creating a culture for teams building interprofessional

relationships and fostering collaboration later chapters move beyond the basics to provide guidance in leading interprofessional teams managing conflict and sustaining the interprofessional effort interprofessional education and collaboration offers a unique pedagogical structure that links ipe concepts with ipcp strategies by connecting research with evidence based practices case studies create opportunities to assimilate and discuss ipe concepts to optimize student engagement and comprehension each chapter contains the following valuable learning aids each chapter begins with a case study that presents a realistic ipcp scenario at the close of each chapter the case study is revisited to apply the chapter themes to the case study and three to five discussion questions are supplied collaborative corner sidebars aid comprehension with reflective questions or statements related to chapter topics this feature will facilitate collaborative learning as students share their interprofessional perspectives tools of ipe sidebars equip readers with resources such as surveys inventories and activities to implement in their daily practice ebp of teamship sidebars showcase contemporary research articles and findings this feature reinforces the connection between ipe and ipcp by summarizing relevant research and supplying corresponding evidence based ipcp strategies as leading health care institutions continue to prioritize ipe and ipcp educators have a responsibility to shape the future of health care through an interprofessional curriculum interprofessional education and collaboration is focused on developing a dual identity that leads to intentional behaviors designed to improve patient outcomes through ipcp readers will conclude this text with a firm understanding of ipe concepts and ipcp implementation strategies that aim to create change in daily practice and improve the impact of health care

leadership and collaboration provides international examples of how leadership of interprofessional education and practice has developed in various countries and examines how interprofessional education and collaborative practice can make a difference to the care of the patient client and community

interprofessional teamwork and collaborative practice are emerging as key elements of efficient and productive work in promoting health and treating patients the vision for these collaborations is one where different health and or social professionals share a team identity and work closely together to solve problems and improve delivery of care although the value of interprofessional education ipe has been embraced around the world particularly for its impact on learning many in leadership positions have questioned how ipe affects patient population and health system outcomes this question cannot be fully answered without well designed studies and these studies cannot be conducted without an understanding of the methods and measurements needed to conduct such an analysis this institute of medicine report examines ways to measure the impacts of ipe on collaborative practice and health and system outcomes according to this report it is possible to link the learning process with downstream person or population directed outcomes through thoughtful well designed studies of the association between ipe and collaborative behavior measuring the impact of

interprofessional education on collaborative practice and patient outcomes describes the research needed to strengthen the evidence base for ipe outcomes additionally this report presents a conceptual model for evaluating ipe that could be adapted to particular settings in which it is applied measuring the impact of interprofessional education on collaborative practice and patient outcomes addresses the current lack of broadly applicable measures of collaborative behavior and makes recommendations for resource commitments from interprofessional stakeholders funders and policy makers to advance the study of ipe

the case for interprofessional collaboration recognises andexplores the premium that modern health systems place on closerworking relationships each chapter adopts a consistent format and a clear framework for professional relationships considering those with the same profession other professions new partners policy actors the public and with patients section one policy into practice considers a series of analytical models which provide a contemporary account of collaboration theory including global developments the second section of the book practice into policy examines real life drivers for behavioural change the third section evaluates personal learning and learning together highlights the barriers to collaboration how to overcome them and the resulting dividends enlivens health policy with a view to transformative adaptations in the workplace draws on international examples of effective practice for local application this book is designed for those in the early stages of their careers as health and social care professionals it is also aimed at managers and educators to guide them in commissioning and providing programmes to promote collaboration

discusses values from the perspective of different health care professionals and why teams and collaborations may succeed or fail

in interprofessional collaboration the benefits of collaboration for patients and carers are confirmed through theoretical models illustrated with case studies of existing examples

a guide for interprofessional collaboration helps students and practitioners develop the skills necessary to engage in successful interprofessional collaborative practice edited by leading researchers the workbook uses bronstein s model for interdisciplinary collaboration as a framework case examples practice tips and multimedia links make this workbook a useful tool for traditional hybrid and fully online courses as well as for independent learning and continuing education page 4 of cover

this book is the fourth in the series on leadership interprofessional education and practice following on from leadership development for interprofessional education and collaborative practice 2014 leadership and collaboration further developments for ipe and collaborative practice 2015 and leading research and evaluation in interprofessional education and collaborative practice 2016 along with policy changes around the globe these three books have stimulated experts in this area to consider

not only the ways in which they introduce and develop interprofessional education and collaborative practice but also how they evaluate their impacts in this 4th book the focus is on the sustainability of these initiatives sharing insights into factors that promote sustainability including leadership approaches and organisational resilience as well as frequently encountered difficulties and ways to overcome them

following the success of opportunities and challenges of interprofessional collaboration and education we are pleased to present volume ii of this collection interprofessional collaboration is essential in meeting today's health challenges which demand high flexibility and innovation many health organizations including the world health organization who demand that interprofessional collaboration should be taught and learned globally even so interprofessional education tools have not yet been widely implemented in the curricula of medical professions incl physicians nurses pharmacists physiotherapists etc this training usually takes place separately collaboration is necessary in health professions education as it can allow professionals to increase their skills and help them achieve more than they would at an individual level collaboration also allows for more open minded approaches when facing new ways of thinking when knowledge is shared healthcare employees are more encouraged to share their own ideas and concerns these achievements of interprofessionalism within health profession education not only benefit the student and employee but also optimize patient care and increase patient safety productivity can also be increased and therefore reduce costs overall

every year the global forum undertakes two workshops whose topics are selected by the more than 55 members of the forum it was decided in this first year of the forum's existence that the workshops should lay the foundation for future work of the forum and the topic that could best provide this base of understanding was interprofessional education the first workshop took place august 29 30 2012 and the second was on november 29 30 2012 both workshops focused on linkages between interprofessional education ipe and collaborative practice the difference between them was that workshop 1 set the stage for defining and understanding ipe while workshop 2 brought in speakers from around the world to provide living histories of their experience working in and between interprofessional education and interprofessional or collaborative practice a committee of health professional education experts planned organized and conducted a 2 day interactive public workshop exploring issues related to innovations in health professions education hpe the committee involved educators and other innovators of curriculum development and pedagogy and will be drawn from at least four health disciplines the workshop followed a high level framework and established an orientation for the future work of the global forum on innovations in health professional education interprofessional education for collaboration learning how to improve health from interprofessional models across the continuum of education to practice summarizes the presentations and small group discussions that focused on innovations in five areas of hpe 1 curricular innovations concentrates on

what is being taught to health professions learners to meet evolving domestic and international needs 2 pedagogic innovations looks at how the information can be better taught to students and where education can takes place 3 cultural elements addresses who is being taught by whom as a means of enhancing the effectiveness of the design development and implementation of interprofessional hpe 4 human resources for health focuses on how capacity can be innovatively expanded to better ensure an adequate supply and mix of educated health workers based on local needs and 5 metrics addresses how one measures whether learner assessment and evaluation of educational impact and care delivery systems influence individual and population health

essay from the year 2005 in the subject health miscellaneous grade pass university of the west of england bristol language english abstract this essay aims to explore different aspects of interprofessional collaboration across healthcare professions and highlights the benefits and potential difficulties associated with interprofessional working these topics were discussed extensively within my interprofessional group and were investigated through enquiry based learning
