this book engages with key contemporary european security issues from a variety of different theoretical standpoints in an attempt to uncover the drivers of foreign policy and defence integration in the eu although european foreign policy has been attracting an ever increasing number of international relations ir scholars since the end of the cold war consensus on what drives european foreign policy integration has not yet emerged this book seeks to encourage debate on this issue by examining a wide range of high profile security issues which have roused significant interest from policy makers academics and the public in recent years the volume discusses amongst other issues the strategic posture of the european union as a security actor the troubled relationship with russia the debate regarding france's relations with the us following france's rapprochement with nato and the eu's

influence in the israeli palestinian conflict the collective intent of the contributors to highlight the drivers of eu foreign policy and defence integration ties together the wide variety of topics covered in this volume forming it into a comprehensive overview of this issue by paying considerable attention not just to the internal drivers of eu cooperation but also to the critical role played by the us as an incentive or obstacle to european security this book presents a unique contribution to this field of debate this book will be of much interest to students of european security ir theory transatlantic relations european politics and eu foreign policy

w r d fairbairn 1889 1964 challenged the dominance of freud s drive theory with a psychoanalytic theory based on the internalization of human relationships fairbairn assumed that the unconscious develops in childhood and contains dissociated memories of parental neglect insensitivity and outright abuse that are impossible the children to tolerate consciously in fairbairn s model these dissociated memories protect developing children from recognizing how badly they are being treated and allow them to remain attached even to physically abusive parents attachment is paramount in fairbairn s model as he recognized that children are absolutely and unconditionally dependent on their parents kidnapped children who remain attached to their abusive captors despite opportunities to escape illustrate this intense dependency even into adolescence at the heart of fairbairn s model is a structural theory that organizes actual relational events into three self and object pairs one conscious pair the central ego which relates exclusively to the ideal object in the external world and two mostly unconscious pairs the child s antilibidinal ego which relates exclusively to the rejecting parts of the object and the child s libidinal ego which relates exclusively to the exciting parts of the object the two dissociated self and object pairs remain in the unconscious but can emerge and suddenly take over the individual s central ego when they emerge the other is misperceived as either an exciting or a rejecting object thus turning these internal structures into a source of transferences and reenactments fairbairn s central defense mechanism splitting is the fast shift from central ego dominance to either the libidinal ego or the antilibidinal ego a near perfect model of the borderline personality disorder in this book david celani reviews fairbairn s five foundational papers and outlines their application in the clinical setting he discusses the four unconscious structures and offers the clinician concrete suggestions on how to recognize and respond to them effectively in the heat of the clinical interview incorporating decades of experience into his analysis celani emphasizes the internalization of the therapist as a new good object and devotes entire sections to the treatment of histrionic obsessive and borderline personality disorders

this book is a synthetic historiography of present day international relations theory a critical analysis of the continuing diversity and complexity of enduring themes through a sustained focus on the analysis of the empirical evidence accumulated by social scientists special attention is given to key historical changes in theoretical approaches over the past half century with full recognition of the contestation over state based theory and the changing fortunes of contemporary approaches the book suggests that viable theories must transcend current intellectual fashion and attempts to bring together theory and practice while demonstrating the difficulty of assessing competing theories it addresses multiple strands of thought and assumes that their development cannot be understood in isolation from each other

international law is playing an increasingly important role in international politics however international relations theorists have thus far failed to conceptualise adequately the role that law plays in politics instead ir theorists have tended to operate with a limited conception of law an understanding of jurisprudence and legal methodology is a crucial step towards achieving a better account of international law in ir theory but many of the flaws in ir's idea of law stem also from the theoretical foundations of constructivism the school of thought which engages most frequently with law adriana sinclair rehabilitates ir theory's understanding of law using cases studies from american english and international law to critically examine contemporary constructivist approaches to ir and show how a gap in their understanding of law has led to inadequate theorisation
